

Australia Vertical Markets 2009-2013 Forecast and Analysis: An Update

This IDC study presents a forecast for 12 vertical markets in the Australia ICT market for the 2009-2013 period. Market sizes and trends are provided for 2009, and a five-year growth forecast is shown for 2009-2013. This study is a data update to the full vertical markets report published in February 2009 (Australia Vertical Markets 2009-2012 Forecast and Analysis, IDC #AU386101S) and reflects IDC's desire to provide customers with the latest and freshest data available. Savvy ICT vendors are expected to target specific vertical markets for which they can exploit their competitive strengths, as they look for innovative ways/new markets when the economy awakens, says Melissa Martin, senior market analyst, IT Spending and Vertical Markets, IDC Australia. This book may contain less than 24 pages of technical content.
