

Critical Millennium: The Dark Frontier

Mankinds rise and fall in space begins here! Two thousand years from now, the Earth is nearly dead. A bold group of explorers led by philanthropist Thomm Coney pushes forward to take the first tentative steps out of Earths solar system. Their quest: new worlds to colonize, so that humanity may yet have a chance at survival. Facing impossible odds, political agendas, and a fanatical terrorist regime bent on their destruction, Coney and his crew brave the dangers of a potentially volatile star drive in order to preserve a civilization intent not only on killing itself, but also on taking down every other living thing around it. Will mankind set aside its greed long enough to see a future amongst the stars? Collects Critical Millennium: The Dark Frontier #1-4 and contains new pages and a frontispiece and afterword by comic creator Chandra Free.
