

## Predator of the Chimera: Death Island

Predator of the Chimera ~ Death Island is a tale of the adventures of Tanner, a professor of biology and astronomy, when he and his friends are shipwrecked during a pleasure cruise. Tanner, an altruistic man with skills far exceeding those of his companions, finds himself trying to piece together mysterious events to make sense of the deaths of his friends. Just hours after they find themselves on a deserted island, Tanners friends start disappearing, only to be found dead at the hands of a terrible monster. As the friends follow Tanners lead, they discover that there is not just one, but two monsters, who are sworn enemies bent on destroying not only the humans, but each other as well. Will Tanner find the way to save his friends?
