

## The Preppers Wife - After Armageddon: An in-depth prepper look at emergency preparedness to self sufficiency & survival after a SHTF or TEOTWAWKI event such as an EMP.

Its not a question of if, its a matter of when a guaranteed electromagnetic pulse (EMP) or coronal mass ejection (CME) will occur next. How will our technology dependent society cope with the loss of readily available electricity? Modern civilization is built on electrical components. When you turn on the faucet or flush a toilet you are utilizing electrically powered water pumps. Your cell phone is filled with circuit boards that would be destroyed by an EMP and the cell towers would be disabled also. Satellites that deliver news would fall from the sky, your t.v. wouldnt be able to receive the signal anyway due to the melted components. Radio, T.V., phones & internet would all be disabled. Loss of communication would complicate and delay any efforts to coordinate disaster relief. The responsibility would fall to you to take care of yourself and your household.
